

Opportunities for federal engagement that would strengthen or supplement the state's response

May 25, 2018

CALT: Alice E., Danielle M., David R., **Mike L.**, Katie C., **Meera K.**, **Larry H.**, Nikoosh C.

Public: Mellisa Heflin,

Form:

- Various avenues to make an impact, effective to focus on different approaches
- Leverage university federal government communication in DC
- Asking Sen. Murkowski about format and effectiveness – engage allies
- Denali Commission coordinator role – action – share recommendations
- USARC – Cheryl Rosa, Fran to mesh forces
- Alaska Climate Change Executive Roundtable – state/federal coordination
- North Slope Science Initiative; other groups
- Look to SAP for current engagement
- DOE visit in June – Nikoosh should connect
- National Lab day in Fairbanks

Content:

- Stafford Act
- Relocation policy
- Federal funding

Goal: Two-way communication – help us effectuate policy/recommendations

Policy informs federal action; agencies begin to align actions

Federal jurisdiction:

- Oceans, navigable waters – mapping, meteorological, data, science infrastructure; maritime fuel use, special traffic, commercial fishing emissions
- Lands – food security, management decisions – cooperative effort between boards, state, federal
- Aviation – emission regulations
- Military installations – state regulates, but couldn't have different emissions reduction requirement than federal without following special procedures
- Tribes
- International arena – representation on IMO, Arctic Council, biodiversity
- Relocation
- Disaster response
- Federal exemptions? Regulatory barriers?

Communications/Request:

- Ask for inclusion in decisions

- Paris Accord withdrawal

Action: Share current drafts with federal agencies or organizations; feedback on objectives
